

Task 2: Training Your Classifier

To get access to the model, a **Train** run has been created for you. Click on **Open Notebook**.

You can also create your own **Train** run:

1. Click on **Train Model** on the side panel and
2. Create a **New training run**, enter a **Name**, choose **Jupyter notebook** as a "Training tool", and select **Convolutional Neural Networks (CNN) with PyTorch**.

Make sure you run the notebook to the end to ensure that the model is saved to CV Studio.
